ESSAY QUESTION (600-800 words)

There are over 151,000 public water utilities in the United States. Recently a water utility in Florida had a cyber-breach where one of the chemicals used in water treatment was tampered via SCADA and increased to a rate 100 times the normal amount. What can these public water utilities do to help improve their SCADA systems from a cyber-attack?

PERSONAL TESTAMENT

I attest to the information contained on this application as being true, and I have not received any help writing this essay. I further understand that if any information is found to be false, it will result in my application being terminated.
